1.Uvod

1.1 Korišćeni programski jezici

Za izradu sajta su korišćeni slededi programski i markup jezici: HTML, CSS, XML, JavaScript i JQuery.

1.2 Opis funkcionalnosti

Dinamčki ispisan navigation meni, drugi meni napravljen za manje rezolucije, više razlilčitih animacija, scroll to top (prezuet jQuery plugin).

Introduction: toggle efekat, interaktivna galerija (prezuet jQuery plugin).

Support us: validacija forme, ispis svih grešaka i njihovo obeležavanje i funkcija za interaktivnu validaciju i ispis cene.

Contact: toggle efekti, validacije forme (blur).

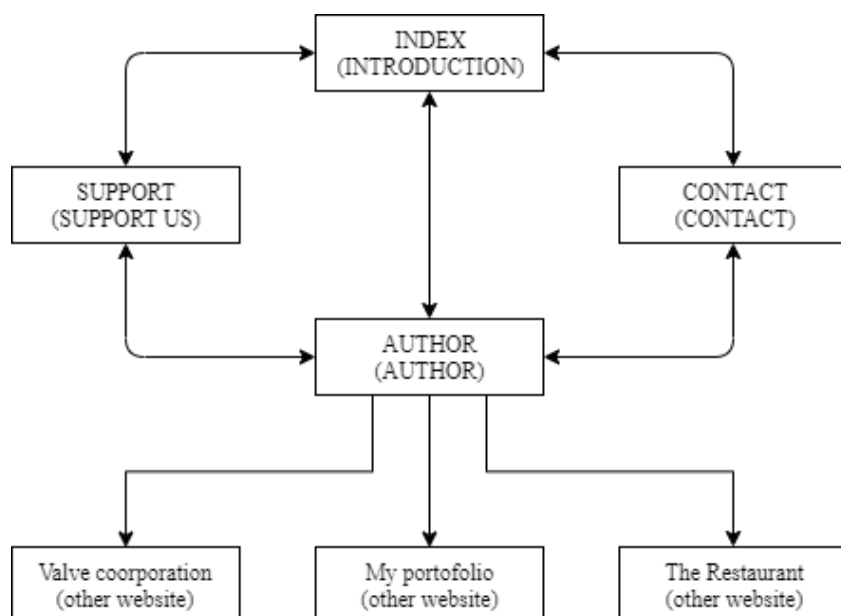

Author: dinamički prikaz linkovane slike (thumbnail) u odnosu na selekciju realizovan niza.

1.3 Template

Nije korišćen.

2.Organizacija

2.1 Organizaciona šema

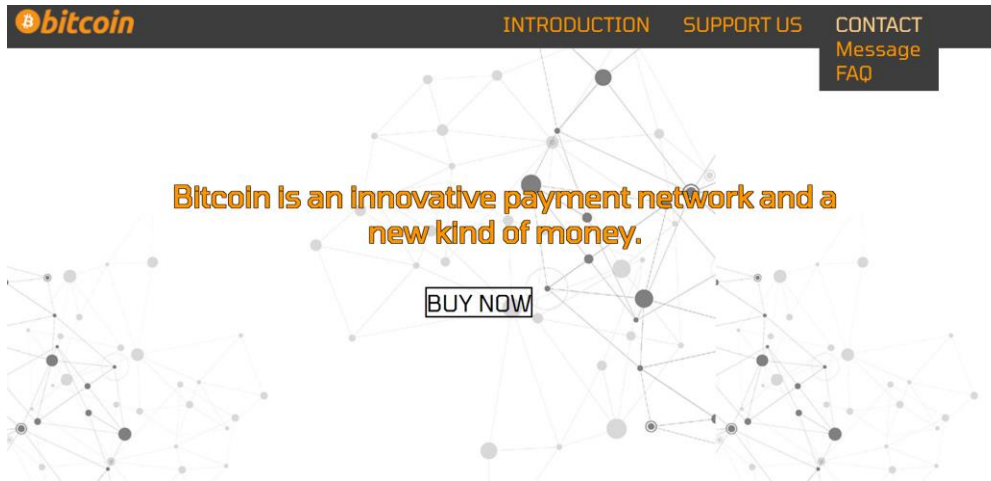

2.2 Mapa sajta

```
<?xml version="1.0" encoding="utf-8"?>

<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9">

    <changefreq>monthly</changefreq>
    <priority>0.2</priority>
  </url>
</urlset>
```

2.3 Slike stranica i opisi funkcionalnosti

2.3.1 Index.html-Menu

Dinamčki ispisan navigation meni pomoću dva niza i dve for petlje ispisan u native javascriptu a pozvan hover metodom u jQuery-u. Linkovi u meniju su smooth scroll. Ispod njega se nalazi dugme realizovano pomoću css-a i jQuery-a (hover).

2.3.2 Index.html-Toggle i Scroll to top

Toggle efekat koji se izvršava click metodom i scroll to top jQuery plugin koji je preuzet sa interneta.

2.3.3 Index.html-Gallery

Galerija jQuery plugin preuzet sa interneta.

2.3.4 Index.html-Footer

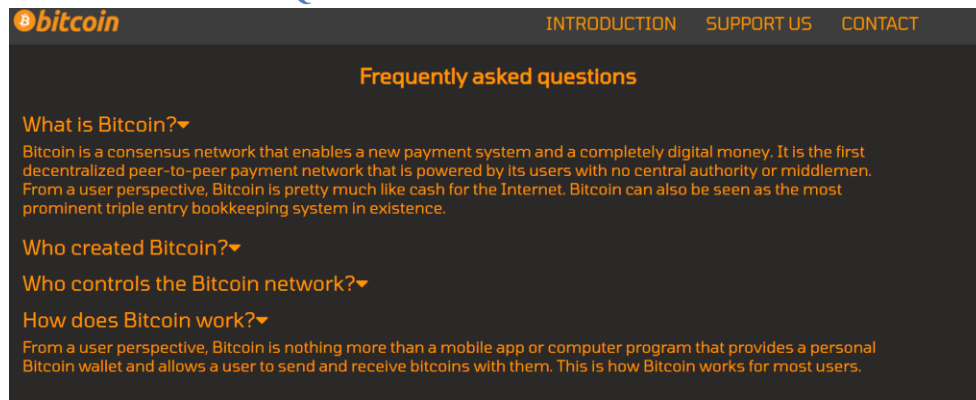

Jquery hover efekat nad linkovima.

2.3.5 Support.html

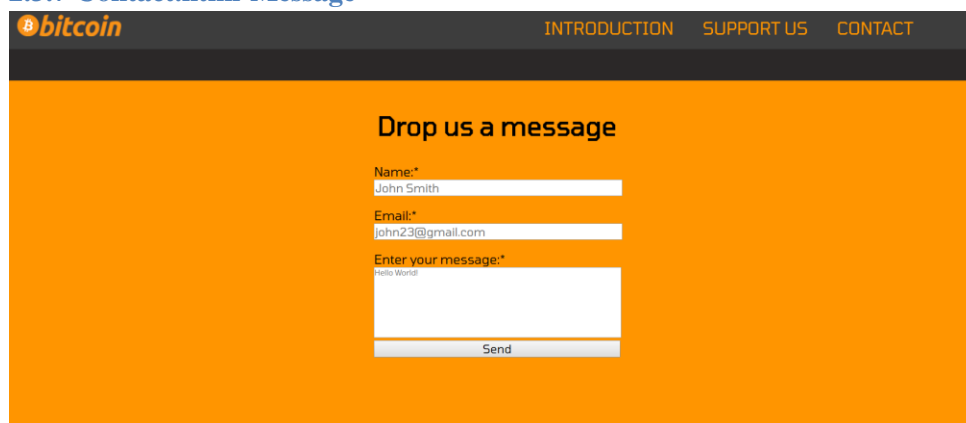

Cena (price) se ispisuje i proverava dinamički u odnosu na selektovanu valutu i broj bitcoina. Dok se ostatak validacije vrši nakon clicka na dugme. Greške se ispisuju iz niza pomoću javascript-a.

2.3.6 Contact.html-FAQ

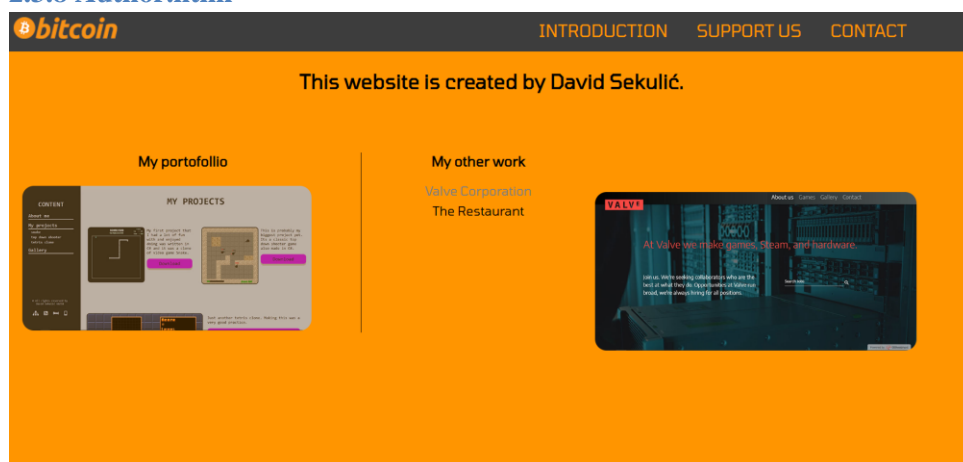

Toggle i hover efekat pomoću jQuery-a i css-a.

2.3.7 Contact.html-Message

Validacija napisana u javascript-u i vrši se pomoću blur metode a greške se ispisuju pomoću css-a.

2.3.8 Author.html

Desna slika se prikazuje dinamički u zavisnosti od toga koji je li tag selektovan. Napisano u javascriptu pomoću niza. Korišćen je i jQuery za hover animaciju preko linkovanih slika i za hover i selekciju li taga.

3. Kodovi

3.1 HTML kodovi

3.1.1 index.html

```

    <div id="faq">
      <h2>Frequently asked questions</h2>
      <div class="question">
        <a href="">What is Bitcoin?<i class="fas fa-caret-
down"></i></a>
        <p>Bitcoin is a consensus network that enables a new payment
system and a completely digital money. It is the first decentralized peer-to-
peer payment network that is powered by its users with no central authority
or middlemen. From a user perspective, Bitcoin is pretty much like cash for
the Internet. Bitcoin can also be seen as the most prominent triple entry
bookkeeping system in existence.</p>

```

```

    </div>
    <div class="question">
      <a href="">Who created Bitcoin?<i class="fas fa-caret-
down"></i></a>
      <p>Bitcoin is the first implementation of a concept called
"cryptocurrency", which was first described in 1998 by Wei Dai on the
cypherpunks mailing list, suggesting the idea of a new form of money that
uses cryptography to control its creation and transactions, rather than a
central authority. The first Bitcoin specification and proof of concept was
published in 2009 in a cryptography mailing list by Satoshi Nakamoto. Satoshi
left the project in late 2010 without revealing much about himself. The
community has since grown exponentially with many developers working on
Bitcoin.</p>
    </div>
    <div class="question">
      <a href="">Who controls the Bitcoin network?<i class="fas fa-
caret-down"></i></a>
      <p>Nobody owns the Bitcoin network much like no one owns the
technology behind email. Bitcoin is controlled by all Bitcoin users around
the world. While developers are improving the software, they can't force a
change in the Bitcoin protocol because all users are free to choose what
software and version they use. In order to stay compatible with each other,
all users need to use software complying with the same rules. Bitcoin can
only work correctly with a complete consensus among all users. Therefore, all
users and developers have a strong incentive to protect this consensus.</p>
    </div>
    <div class="question">
      <a href="">How does Bitcoin work?<i class="fas fa-caret-
down"></i></a>
      <p>From a user perspective, Bitcoin is nothing more than a
mobile app or computer program that provides a personal Bitcoin wallet and
allows a user to send and receive bitcoins with them. This is how Bitcoin
works for most users.</p>
    </div>
  </div>

  <div id="message">
